	Savings (gal)	1.55	0.72	2,525	
	Water Savings	55%	26%	49%	

*** Evaluation Process:**

When installed with Perfect Flush, each toilet is set with the most efficient "Half & Full" flush timing. Daily per person toilet flushing requirement is based on 4 flushes for fluid disposal and 1 for solid disposal. Perfect Flush will utilize "Half Flush" for fluid disposal and "Full Flush" for solid disposal. After 5 flushes (with & without Perfect Flush), volume data of total water consumption is gathered and compared.
